

Corkdorks Drink Calculator

Use these simple formulas to determine how many bottles you'll need to purchase for your next party. Ask an associate in the store to help you calculate your needs or use this help guide for your next purchase online

Number of guests **A**

Drinks Required per Guest = **B**
*Based on length of event

1 Hour =

2 Hours =

3 Hours =

4 Hours =

5 Hours =

Wine:

 A Guests \times **B** Drinks $\times 0.35 \div 5 =$

*750ml Bottles Needed

Beer:

 A Guests \times **B** Drinks $\times 0.20 =$

*12oz Servings of Beer Needed

Spirits:

 A Guests \times **B** Drinks $\times 0.45 \div 22 =$

*1L Bottles Needed

If you do not anticipate serving mixed drinks at your event, then you should plan on 70% of your guests consuming wine and 30% beer.

Wine:

 A Guests \times **B** Drinks $\times 0.7 \div 5 =$

*750ml Bottles Needed

Beer:

 A Guests \times **B** Drinks $\times 0.3 =$

*12oz Servings of Beer Needed
